Enabling human capital management to support the goal to change the lives of 100 million girls

Plan Limited works around the world to advance human rights for children and equality for girls through child sponsorship and grassroots community efforts. To do this requires agile and responsive human capital management, but multiple processes and systems had led to increased complexity and inefficiency. Plan wanted to consolidate HR and transform its digital landscape with cloud solutions that could help the organization respond quickly and with the right resources in challenging and emergency situations.
With SAP® SuccessFactors® solutions and SAP Preferred Success services, Plan Limited was able to:

- Transform its digital landscape by consolidating and enabling employee, recruiting, onboarding, compensation, and performance management processes
- Implement and adopt new functionality quickly – in just six months – and gain expertise about cloud processes and solutions, thanks to knowledge transfer and dedicated support
- Get resource navigation tips for an administrator learning center and SAP Learning Hub, along with personalized quarterly release documentation, to help upskill the company’s support team
- Enable planners to quickly locate human capital resources during emergencies
- Streamline, automate, and improve processes through success checks after going live
- Benefit from product innovations through programs for early adopter

Integrated, streamlined HR processes enable better agility and support Plan’s efforts to improve life for girls around the world.

“Our engagement with SAP Preferred Success made a big impact on our digital transformation. The services helped us with upskilling and getting familiar with the environment, and we could ask questions and get answers and clarification quickly.”

Caroline Shirley, SAP Team Leader, Plan Limited
