

SAP® Model Company for Core Retail

The SAP® Model Company for Core Retail service offers a comprehensive enterprise resource planning (ERP) solution for retailers. Based on project best practices and preconfigured, retail-specific scenarios, including master data and business process documentation, the service enables the project to discover SAP S/4HANA® 1610. The service addresses the full merchandising loop – from master data creation to procurement, merchandise supply, and registry at the point of sale.

Business Processes and Capabilities

Master Data, Pricing, and Promotions

- Article master and hierarchies
- Sites and business partners
- Assortments and listings
- Valuation and retail pricing
- Promotion management

Procurement and Settlement

Delivery Approach

Preconfigured Solution

- Ready-to-run appliance with applications, configuration, and sample data
- System provisioning over the SAP Cloud portfolio, your preferred cloud provider, or on premise

Business Content and Accelerators

- Business-process documentation
- Template business blueprint
- Configuration guides

When to Consider

- Implement from scratch, upgrade to the latest innovations, or eliminate unused custom developments
- Enable and discover the solution with a show approach instead of a tell approach to the project
- Optimize product quality by using best practices and processes supported by SAP software

Benefits

- Reduced costs and resource effort thanks to a preconfigured, ready-to-run solution
- Elimination of risk through proven reference-solution architecture and comprehensive process support
- Increased innovation adoption and decreased time to value through agile and lean principles
- Accelerated enablement and increased engagement
