Inventory Planning

- Supply Chain Control Tower
- IBP for inventory
- S/4 HANA to IBP integration

Cross Functions

- Deliver integrated, unified planning across sales and operations, supply, demand, and inventory
- Transfer data from SAP S/4HANA® to the SAP Integrated Business Planning solution
- Integrate point-of-sale and market-research data with demand planning and improve demand forecasts
- Gain visibility into the downstream business between distributor and retailer, and retailer and consumer; visualize the entire demand network

Demand Management

- IBP and DSIM integration

Applications

- ▶ SAP Integrated Business Planning 1611
- ▶ SAP S/4HANA® 1610
- ▶ SAP Demand Signal Management 3.0

Delivery Approach

Preconfigured Solution

- Ready-to-run appliance with applications, configuration, and sample data
- System provisioning over the SAP Cloud portfolio, your preferred cloud provider, or on premise

Business Content and Accelerators

- Business-process documentation
- Configuration guides, test scripts

When to Consider

- Evaluate the capabilities of a comprehensive SAP solution for your specific use case
- Demonstrate a system for enablement, fit-gap analysis, and solution design
- Support an agile and lean implementation approach with hands-on experience from day one
- Proof-of-concept project

Benefits

- Reduced costs and resource effort thanks to a preconfigured, ready-to-run solution
- Elimination of risk through proven reference-solution architecture and comprehensive process support
- Increased innovation adoption and decreased time to value through agile and lean principles

Service Scope Options

- ▶ Initial setup of the SAP IBP, S/4HANA and other systems in a PoC environment
- ▶ Delivery and handover of the process and system documentation
- ▶ Knowledge transfer with walk-through sessions
