Hydrocarbon Production

Manage convergence of hydrocarbon production, maintenance, engineering, and finance.

Field Logistics | Hydrocarbon Production Management | Hydrocarbon Revenue Management

Shell International B.V.
See how Shell is using SAP solutions to meet the needs of its customers, with the goal of providing cleaner energy in the future.

State Oil Company of Azerbaijan Republic (SOCAR)
Read how SOCAR retains its position of dominance in the world’s oil market using the SAP Upstream Operations Management application, among other SAP solutions.

Assala Energy Inc.
Learn how Assala, with partners Accenture and Opportune, implemented SAP S/4HANA for its digital core, leveraging the Accenture Upstream Direct Industry Template to expedite the project.

Industry
Oil and Gas
Hydrocarbon Production
Field Logistics
Hydrocarbon Production Management
Hydrocarbon Revenue Management

Manage convergence of hydrocarbon production, maintenance, engineering, and finance.

Field Logistics
Close the loop between execution of field logistics with service providers.

Hydrocarbon Production Management
Integrate hydrocarbon production, maintenance, engineering, and planning.

Hydrocarbon Revenue Management
Streamline management by converting finance and revenue processes for your upstream company.

SAP Asset Manager
Provide a rich and flexible access to context-rich visualizations and actionable insights from simple and timely information to drive informed enterprise asset management processes.

SAP S/4HANA
Enable field- and yard inventory management with asset management for oil and gas, and track and utilize field equipment and fulfill goods with streamlined and extended capabilities.

SAP Production and Revenue Accounting
Enable the report driver, which is a centralized, standardized tool used to submit most of the tax, royalty, and production reports.

SAP Asset Manager
Provide online and offline access to context-rich visualizations and actionable insights to enable simple and timely information to drive informed enterprise asset management processes.

SAP Upstream Operations Management
Gather operations data, including well and plant flows, temperatures, and pressures, which can then be analyzed to improve and exploit your producing assets.

SAP S/4HANA
Enable well and yard inventory management with asset management for oil and gas, and track and utilize field equipment and fulfill goods with streamlined and extended capabilities.

SAP Asset Manager
Enable a simplified and engaging user experience using the SAP Fiori for iOS and SAP Fiori for Android design languages.

SAP Upstream Operations Management
Gather operations data, including well and plant flows, temperatures, and pressures, which can then be analyzed to improve and exploit your producing assets.

SAP Production and Revenue Accounting
Enable the report driver, which is a centralized, standardized tool used to submit most of the tax, royalty, and production reports.

Hydrocarbon Production

Multi-resource Maintenance Planning and Scheduling
Plan and schedule maintenance task planning, cost control, and budgeting.

Field Mobility
Immediately close the loop on field activities as they take place in the field with mobile back-end functionality.

Well and Yard Inventory Management
Track and value oil field equipment and fulfill goods with streamlined and extended capabilities.

Remote Logistics Planning
Improve supply and return by integrating remote logistics planning for less downtime and supply risk.

SAP Asset Manager
Provide a rich and flexible access to context-rich visualizations and actionable insights from simple and timely information to drive informed enterprise asset management processes.
