How Can Partners Stay on Top of Cutting-Edge Technology Offerings and Support Customers Better?

Technology products, services, and engineering built on four decades of innovation

Enterprises around the world count on next-generation support from HCL Technologies Ltd. to reimagine their businesses for the digital age. By bringing its world-renowned management philosophy, a strong culture of invention, and a relentless focus on service, HCL has unique skills to help clients thrive. Part of this is working as an SAP partner for Internet of Things (IoT) technology deployment and adoption – requiring HCL consultants to stay on top of ever-evolving SAP® technology innovations. To improve its productivity, HCL needed a single online platform for all its SAP software learning and training needs.
With tailored e-learning, consultants at HCL improve productivity by 10% to 20% and free up more time to focus on clients.

With SAP® Learning Hub, consultants at HCL Technologies Ltd. now have:
• 24x7 online access to a wide array of training and enablement from SAP offerings – all in one place
• Faster access to training materials and documentation
• Convenient and flexible learning that can accommodate individual schedules
• Lower average costs per training
• The ability to evaluate new SAP products, as well as quarterly updates and new features
• Guidance to develop the skills needed to support clients with the SAP Leonardo® Internet of Things portfolio and other SAP Leonardo technologies

“HCL consultants are maximizing their learning time and productivity through intuitive, easily accessible training. Now, with SAP Learning Hub, they’re bringing greater value to the customer and our company.”

VP, SAP Practice Head, HCL Technologies Ltd.
