Operational Integrity

Improve operational integrity and asset performance, and reduce operational expenditures.

Management and Optimization

Asset Operations and Maintenance

- Improve process safety and operational integrity, while reducing enterprise operating risk.
- Improve equipment reliability through a unified and flexible HR platform.
- Enable mobile maintenance processes to improve technician productivity.
- Determine target inventory quantities to optimize future.
- Reach out with comments, questions, or feedback.

Environment, Health, and Safety

- Enable accurate workforce payments and activity based accounting by providing comprehensive time and budget capabilities.
- Orientate or onboard new workers, manage departures.
- Optimize labor utilization while complying with complex shift planning policies.

Spare Parts and Materials Management

- Collect and track equipment information in a central repository. Operators and manufacturers automatically receive asset usage and failure data.
- Visualize and control spare parts and materials inventory.
- Identify, analyze, and resolve safety issues and risk mitigation, and documentation approval.

Total Workforce Management

- Automate and improve accuracy for carbon emission calculations.
- Automating and improving accuracy for carbon footprint.
- Create and maintain project proposals for capital expenditures.
- Establish work orders for billed customers that build your business for the future.

Asset Performance Management

- Maintain a single, comprehensive view of all assets to support agility and business strategy.
- Enable access up to date maintenance strategies and manuals from manufacturers.
- Collect and track equipment information in a central repository. Operators and manufacturers automatically receive asset usage and failure data.

SAP Fieldglass Contingent Workforce Management

- Facilitate and streamline processes for finding, sourcing, and managing flexible workers with external workforce management functionality.
- Improve technician productivity by providing all information required to install, inspect and maintain assets on mobile.

SAP Fieldglass Talent Network

- Discover how SAP SuccessFactors solutions enabled HollyFrontier to have significantly improved productivity, asset uptime, and safety.
- Facilitate and streamline processes for finding, sourcing, and managing flexible workers with external workforce management functionality.
- Enable mobile maintenance processes to improve technician productivity.
- Develop near skilled workforce that leads your business into the future.
- Discover how SAP SuccessFactors solutions enabled HollyFrontier to have significantly improved productivity, asset uptime, and safety.

SAP Service Parts Planning

- Visualize and control spare parts and materials inventory.
- Identify, analyze, and resolve safety issues and risk mitigation, and documentation approval.
- Automate and improve accuracy for carbon emission calculations.
- Automating and improving accuracy for carbon footprint.
- Create and maintain project proposals for capital expenditures.
- Establish work orders for billed customers that build your business for the future.

SAP Asset Manager

- Manage physical assets to cut operating and capital costs and improve operational safety and asset use.
- Help ensure competency with the right workers available and prepared for operations and maintenance.
- Enable mobile maintenance processes to improve technician productivity.
- Determine target inventory quantities to optimize future.

SAP Asset Performance Management

- Manage critical assets in a cost-effective and scalable approach to improve asset maintenance and optimize service.
- Improve technician productivity by providing all information required to install, inspect and maintain assets on mobile.
- Collect and track equipment information in a central repository. Operators and manufacturers automatically receive asset usage and failure data.
- Automate and improve accuracy for carbon emission calculations.
- Automating and improving accuracy for carbon footprint.
- Create and maintain project proposals for capital expenditures.
- Establish work orders for billed customers that build your business for the future.
