Healthcare Provider Admission to Cash

Effectively manage administrative, billing and marketing healthcare processes to become more efficient.

Drug Safety and Compliance | Patient Administration and Billing

- **Pharmaceutical Item Serialization for Regulatory Compliance**
  Comply with worldwide regulations governing item-level serialization for pharmaceutical products.

- **Drug Safety and Compliance**
  Ensure drugs are safe and compliant using traceability solutions.

Timely response to inpatient and outpatient needs through cross-functional process integration.

- **Case Costing**
  Make better decisions by receiving detailed, instant insights into costs per case.

- **Healthcare Coding**
  Help ensure best reimbursement and insight into costs by accurately recording all services rendered.

- **Patient Charging**
  Implement a scalable solution to manage the increasing volume of charges across the health network as patient care gets more complex.

- **Patient Billing**
  Automatic reuse of patient and treatment data for invoice creation, and distribution of billable items to correct payers.

- **Patient Access**
  Integrate patient scheduling and patient registration processes.
