Increase Control of Your End-to-End Manufacturing Supply Chain
Consulting services for SAP Digital Manufacturing Cloud / SAP Digital Supply Chain

Business Challenges
• Impact to sources of supply (JIT/JIS/OEM) due to boarder closure and logistics bottlenecks
• Surplus inventory stock and lack of ability to distribute to the extended value chain
• Need to optimize capital held in existing inventory

Business Outcome
• Increased transparency across the full supply chain
• Improved coordination of production and material flows along the supply chain
• Increased cooperation with suppliers and original equipment manufacturers (OEM’s)
• Reduction in shop floor downtime and consistency checks of the supply chain

Deliverables and Timeframes
• Installation of the automotive consulting services (JIT/JIS) package within 1 - 2 weeks
• Customizing of the process and hand over (offs-site) workshop within 2-4 days

Service Description
This service allows you to choose, implement, customize, and operate the right (JIT/JIS) optimizations and enhancements for your business needs.

Industry Relevance
• Discrete manufacturing, Automotive, IM&C

SAP Solutions
• SAP S/4HANA
• SAP ECC 6.0
