Industry | Defense and Security
---|---
**Military Supply Chain**

Support every mission’s success with responsive supply chains and logistics.

**Defense Equipment Management | Defense Inventory and Movement Management | Defense Replenishment and Planning | Defense Relocation Planning and Execution**

### Defense Equipment Management
- Improved processes for managing personnel, policy, and unit organization equipment.

### Defense Inventory and Movement Management
- SAP Integrated Business Planning
  - Synchronize supply chain planning in real time, including S&OP, demand and supply planning, and inventory optimization.

### Defense Replenishment and Planning
- **Structural Equipment Management**
  - Manage structural equipment for the armed forces, police, and other aid organizations.
- **Functional Equipment Management**
  - Streamline functional category equipment management for enhanced defense and security operations.
- **Personal Equipment Management**
  - Manage personal category equipment for persons in armed forces, police, and aid organizations.

### Defense Relocation Planning and Execution
- **Dangerous Goods Management**
  - Provide safe and compliant transportation of hazardous materials to avoid delivery delays and protect brand value.
- **Inventory and Movement Management**
  - Link inventory and movement management processes for hydrocarbon products.
- **Defense Transportation**
  - Manage transportation planning and transportation processing for defense organizations.
- **Demand Sensing and Planning**
  - Improve demand sensing and planning to achieve more timely and accurate short-term forecasts.
- **Relocation Planning**
  - Relocate an armed force, police, or aid group’s organizational structure with requirement creation.
- **Relocation Supply Operation for Defense**
  - Streamline supply processing operations based on prioritized goods requirements during force relocations.
