

# Why SAP S/4HANA Cloud

1

## Make ERP Intelligent

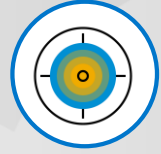

SAP S/4HANA Cloud makes ERP Intelligent by delivering predictive analytics, machine learning, and digital assistance to accelerate decisions, improve efficiency and empower users

**Predictive Analytics:** Get instant visibility into every aspect of your business and move beyond automation to intelligent, predictive suggestions.

**Embedded Machine Learning & AI:** Gain access to next generation innovations to eliminate low-value and redundant steps and help users quickly identify areas requiring attention and action.

**Digital Assistant:** SAP CoPilot puts machine learning to work as your co-pilot, where users receive notifications and reminders to drive action and decisions at the speed of thought.

2

## Deliver Instant Value

SAP S/4HANA Cloud helps organizations manage a rapid pace of change, ensuring access to the latest technologies and delivering instant value, while providing the agility and flexibility to adapt to changing business conditions.

**Quarterly Innovation:** With a 4-quarter roadmap available, SAP provides the transparency to customers and partners to ensure planning consistency.

**Integrate & Extend:** With the SAP S/4HANA Cloud SDK and the SAP Cloud Platform, easily extend your Cloud ERP application and create custom applications that provide maximum resilience, quality and performance.

**Rapid Global Adoption:** Enjoy shorter time-to-value from your Cloud ERP application through proven SAP Agile Methodology and Customer Lifecycle Management services.

3

## Ensure Business Impact

SAP S/4HANA Cloud can grow and adapt to an organization's changing needs, delivering modern capabilities to enable differentiation and long-term impact.

**Smooth Transition To Cloud:** Easily adapt your ERP stack to include a mix of SaaS, private cloud and on-premise solutions, depending on your organization's needs.

**Industry Solutions & Best Practices:** Differentiate with best-practice business processes as well as in-depth capabilities for Professional Services and Component Manufacturing. Get continued support for a wide range of regulations and languages.

**Enterprise-scale Digital Transformation:** Access the most powerful suite of cloud solutions to span the front-office to the back-office, including SAP Leonardo and the SAP Cloud Platform to enable innovation and digital transformation at cloud speed.
