The SAP Model Company for Supply Chain Planning service offers a ready-to-run, comprehensive reference solution, including the SAP Integrated Business Planning for Supply Chain solution. It is delivered with relevant business content, accelerators, and enablement services, helping you reduce costs, decrease risks, and accelerate adoption during discovery, exploration, and realization.

**Business Processes and Capabilities**
- Deliver integrated, unified planning across sales and operations, supply, demand, response, and inventory
- Transfer data from SAP S/4HANA to SAP Integrated Business Planning for Supply Chain
- Gain visibility into the downstream business between distributor and retailer, and retailer and consumer; visualize the entire demand network

**Sales and operations planning**
- Align demand and supply plans with executive financial targets and key performance indicators
- Integrate SAP S/4HANA and SAP Integrated Business Planning for Supply Chain

**Demand planning**
- Manage and analyze demand streams to feed operational planning and drive greater productivity and customer satisfaction
- Integrate SAP S/4HANA and SAP Integrated Business Planning for Supply Chain
- Integrate SAP Integrated Business Planning for Supply Chain with SAP Demand Signal Management

**Response and supply planning**
- Supply and allocation planning
- Response Planning
- Deployment Planning
- Inbound and outbound integration with SAP S/4HANA

**Inventory planning**
- Determine the optimal inventory levels to drive supply planning
- Maximize customer service levels and minimize working capital investments

**Control tower and business network collaboration**
- Quickly identify and resolve supply chain problems with end-to-end visibility, real-time monitoring, analytics, alerting, and exception management
- Share information with your business partners in a controlled manner: supplier commit with SAP Ariba

**Business content and accelerators**
- Business-process documentation
- Configuration guides, test scripts

**Delivery Approach**
- Preconfigured solution
  - Available as an appliance from SAP Cloud Appliance Library for provisioning on Amazon Web Services, Microsoft Azure, SAP HANA Enterprise Cloud, or from Blu-ray discs for on-premise deployment
- Business content and accelerators

**When to Consider**
- Discover the capabilities and innovations of a comprehensive SAP solution for your specific use case
- Prepare and explore using a ready-to-run system for enablement, fit-gap analysis, and solution design
- Support an agile and lean implementation approach with hands-on experience from day one
- Address resource bottlenecks in IT and business, and reduce time and effort during realization
- Proof-of-concept project

**Benefits**
- Reduced costs and resource effort, thanks to a preconfigured, ready-to-run solution
- Elimination of risk through proven reference-solution architecture and comprehensive process support
- Increased innovation adoption and decreased time to value through agile and lean principles
- Accelerated enablement and increased engagement
